

Quality Action
Improving **HIV** Prevention in Europe

WP6 Practical Application

What does WP 6 want to accomplish?

- WP 6 wants to accomplish the application of at least 80 quality improvement/ quality assurance (QI/ QA) tools in HIV Prevention projects/ programs throughout Europe. All WP 6 activities aim to enable and assist these applications.

What actions will take place in WP 6 to achieve this?

- We will develop **criteria** to assist you (and other interested stakeholders) in choosing
 - a. a matching QI/ QA tool
 - b. to a suitable/ relevant project/ program
 - c. in a beneficial/ supportive environment
 - d. to support your (or that stakeholder's) work.
- We will assist you (and any other interested stakeholder) with the **planning of the tool application** phase (at the end of the first tool training block)
- We will provide you (and any other interested stakeholder) with **communication tools** to use for "peer support" during the application phase (web-based)
- We will be your **contact point** for any other upcoming questions in the process
- We will ask you and others for **feedback** on the application process

What are the next steps?

- Our first WP 6 meeting is on June 27/28. Our work plan will be settled then.
- The supportive application criteria will be finalized soon after the WP 6 meeting
- From June 2013 – March 2014 we are looking for interested organizations and projects to take part in the application of the QI/ QA tools
- If you can already know which tool you will apply to your own project/program, if you already know you want to apply a tool, if you know people/ organizations that might want to apply a tool or if you just want to know more – please don't hesitate to get in touch with us!

Who are the main partners of WP 6 and how can you get in touch?

Feel free to contact us - we are all looking forward to hearing from you!
